## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 2-7 and 10-18 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the use of an oil-polymer mixture blended at 200 degree Celsius, does not reasonably provide enablement for the use of an oil-polymer mixture blended at a lower temperature. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make or use the invention commensurate in scope with these claims. See paragraph 0032 and Examples 1 and 3 of the specification.
3. Claims 10 and 14-18 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for blending asphalt and sulfur at a temperature greater than 200 degree Celsius, does not reasonably provide enablement for blending asphalt and sulfur at a lower temperature. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims. See paragraph 0014 and the Examples.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 8 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Clementoni et al. 4,283,231.

6. Clementoni et al. disclose asphalt blended with sulfur and mixing the blend with a petroleum fraction having a boiling range of 395-475 degrees Celsius. The Abstract defines the same oil as vacuum gas oil or extract oil having a boiling point of 370-500 degrees Celsius, making it definitely an aromatic heavy oil. See also Example 3.

Applicants' claims are not novel.
